Professional Summary

Motivated Architectural Technologist with over 2.5 years of experience in CAD drafting, construction documentation, and remote project collaboration. Proficient in AutoCAD with a strong foundation in Revit, Tekla, and SketchUp. Known for reliability, attention to detail, and the ability to work independently while meeting strict deadlines. Seeking a full-time position where I can contribute to innovative architectural projects while continuing to expand my technical skills.

Professional Skills

- Architectural drafting and construction documentation
- AutoCAD (2D & 3D) and Revit (foundational)
- Tekla Structures and Google SketchUp
- 3D modeling and rendering (Lumion)
- Material scheduling and shop drawing coordination
- Self-directed work ethic with strong time management
- Detail-oriented with excellent troubleshooting abilities
- Reliable team player with a willingness to learn

Work Experience

EFG Architects - Edmonton, AB

Junior Architectural Technologist (Remote) | November 2023 - July 2026

- Produced detailed construction drawings and documentation for a variety of residential and commercial projects using AutoCAD
- Received project assignments from senior technologists and independently managed completion to meet strict deadlines
- Ensured all drawings were accurate and complete prior to submission for review by senior team members
- Implemented feedback and revisions efficiently, consistently meeting quality standards
- Worked within a fully remote team environment, demonstrating strong self-discipline and effective virtual collaboration skills
- Managed multiple projects simultaneously while maintaining attention to detail and schedule adherence

Brytex Building Systems - Edmonton, AB

Junior CAD Technician | April 2023 - August 2023

- Created 3D models using Tekla Structures, verifying all connections to Brytex standards
- Produced model exports for Revit and AutoCAD users to develop renderings and interior/exterior finishings
- Developed material schedules for the fabrication shop to ensure timely ordering of materials
- Created CNC machining drawings and shop personnel instructions for parts manufacturing
- Assembled comprehensive field packages including parts indexes, erection drawings, and renderings

Mikitecture - Edmonton, AB

Architectural CAD Technician - Practicum | November 2022 - January 2023

- Produced accurate CAD drawings for renovation projects based on provided measurements
- Used AutoCAD, Google SketchUp, and Lumion to develop models and renderings
- Implemented revisions and maintained CAD models throughout project lifecycles
- Produced and updated construction drawings to reflect design changes

Clean Harbors - Edmonton, AB

Class 3 Operator | February 2018 - November 2022

- Operated tandem and triple axle vacuum, combination, and pressure washing trucks
- Performed detailed pre- and post-operation equipment inspections to ensure safety and compliance
- Maintained strong client relationships through reliable, high-quality service
- Completed all required paperwork, reports, and safety certifications

Education

- CAD Technician Diploma | CDI College | Edmonton, AB | January 2023
- Drafting and design fundamentals, floor plans and elevations, construction drawings
- AutoCAD 2D essentials, advanced 2D, and 3D modeling
- Technical mathematics and technical communication
- Fundamentals of computers and software applications
- High School Diploma | Eastglen High School | Edmonton, AB | June 2001
- In-house safety training and industry certifications (Clean Harbors)
- Various safety courses and certifications (GFL)
